Lobby

The lively center in our Reichshof Hamburg offers impressive architecture and design elements from various stylistic periods that meet the dynamic atmosphere of a big city. In the hotel lobby the EMIL'S – Café, Bistro and Bar, named after the founder Anton Emil Langer, serves homemade cakes, chocolates and other delicacies. A salon offers room for unconventional communication on a „Business Table“, internet terminals and retro record player. The lobby provides a vibrant and urban lifestyle through a media music concept and an effective light initiation.

Stadt Restaurant

Local gastronomy within antique ambiance. Since January 2017 the hotel's centerpiece, Stadt Restaurant, returned to bearing its original name, given with the opening of the hotel in 1910. Head Chef Mario Regensburg and team, besides offering typical German dishes, extend an international culinary selection to suit the most delicate of pallets. Cooking in the rhythm of nature and focusing on organic and regional ingredients is at the core of this gem restaurant.
